TODAY'S BRIGHT SPOTS

■ Palo Alto Approves Renewable Energy Program

The Palo Alto City Council has approved the Clean Local Energy Accessible Now (Clean) program, which will enable local residents and businesses to sell electricity generated by renewable sources, such as solar panels, back to the city utility. This "feed-in tariff" program builds on an existing rebate program for solar panel buyers in the city. [Read more here.](#)

■ Google Continues to Step Up Renewable Energy Efforts

Google is boosting its wind-power purchases, even as the company announces that the 30 percent of the energy it consumed last year from renewable sources mostly came from wind power. Of the \$917 million that the company has invested in renewable-energy projects, meanwhile, about
